EXPERIENCE

KODWARE, Rawalpindi — **Front-end +Backend in MernStack**
October 2024, Present

I'm a Front-end and Backend in MernStack, Developer, specializing in RESTful APIs and frontend development with React.js. I've worked on an online coaching platform, building key components using. NET, React.js, and Redux.

PROJECTS

Master Quiz —

QuizMaster Pro is an advanced timed exam and quiz system designed to deliver personalized assessments for users. The platform dynamically generates random questions and answer choices for each participant, ensuring a unique experience every time. It includes a robust timed exam feature, providing an accurate measure of performance under time constraints.The system is ideal for educational institutions, corporate Training, and online learning platforms looking to offer secure and scalable assessments
